June 2009- News and Bargains

Check out the newest addition to our website in the [New Items](#) section. You will find the newest tools, supplies, and glass that have been added to our site and to our outlet store. The new items section will be updated monthly and you will always find something interesting. Be sure to add it to your favorites and check back often. Here are a few of the items that have just been added.

New Stained Glass Colors

Armstrong Glass has just introduced 2 new solid opal colors to its standard line of stained glass. The first color, which we have been asked frequently to make, is a [light chocolate brown](#). The second addition is a [dark aqua](#). We have also added [bronze rough rolled](#) to our offerings of Spectrum glass. In addition we now carry a gorgeous mix of [red opal and black](#) made by Uroboros. This glass is made with an opal red so it looks beautiful with or without light.

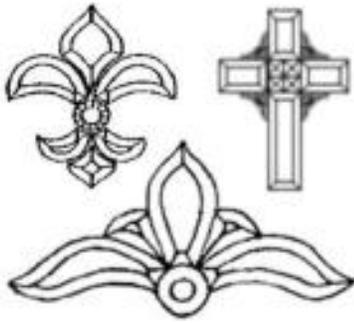

We are proud to carry a selection of [Kokomo glass](#) including some of their celtic pattern. Please feel free to call or [email us](#) if you are looking for a particular color.

[New Mosaic Materials](#)

Precut stained glass tiles make any mosaic project easy. We now have 1 pound bags of assorted colors available. Let us do all of the work of cutting the $\frac{3}{4}$ " tiles so that you can have all of the fun. Want a specific color? Call us for a quote.

Add some depth to your next mosaic or stained glass project with these 3 dimensional critters and things. The ladybugs would look great on a mosaic flowerpot and the butterflies and hearts would make a wonderful addition to a mosaic picture frame.

[New Bevel Clusters are Now Available](#)

Many hobbyists and artisans have never used bevels or bevel clusters. Just treat a bevel like any other piece of glass. Bevel clusters are easy to work with and add elegance to any panel. The bevels are cut to fit together perfectly so all you have to do is foil and solder. Here are a few of the most popular bevel clusters with many more coming soon.

Project Ideas

The Float Fire 82 [fused glass projects](#) incorporate bevels into the fused panels. These projects were tack fused so that the bevels would keep their shape. These panels came out looking great, but don't just take our word for it. Give it a try.

The $\frac{3}{4}$ " stained glass tiles and a 2" beveled mirror were used to create this [mosaic project](#). It is a quick project that anyone can do. Use your own colors or add in some other mosaic materials to make it your own.
